PROFILE

Laravel Developer with 2 years of hands-on experience in building and maintaining web applications. Skilled in PHP, Laravel, MySQL, HTML, CSS, JavaScript, and RESTful APIs. Passionate about writing clean, scalable code and delivering efficient solutions. Strong understanding of backend development with the ability to integrate frontend technologies for seamless user experiences.

WORK EXPERIENCE

Laravel Developer   2024 – 2025

- Developed and deployed multiple e-commerce websites with features such as product management, order processing, inventory tracking, and customer dashboards.

- Built Point of Sale (POS) systems for cafés, retailers, and paint shops to manage billing, stock, and daily sales reports.

- Designed and implemented a POS and service management system for auto workshops, including job cards, invoicing, and spare parts System

- Created custom dashboards and reporting modules to help businesses analyze sales, profits, and expenses in real time.

- Implemented user authentication, roles, and permissions to manage staff access across different systems.

- Designed and optimized database structures for scalability and high performance.

- Developed status update and chat features to improve customer communication inside applications.

- Added functionality for media uploads (images, videos, PDFs) within chat and management systems.

- Designed responsive frontends using Blade, HTML, CSS, JavaScript, jQuery, and Bootstrap/TailwindCSS

- Optimized backend logic and queries to ensure fast response times and reduced server load.

- Wrote clean, maintainable, and reusable code following Laravel best practices.

- Worked on live servers and successfully deployed applications using platforms like Namecheap (cPanel, shared hosting, VPS), making systems live and accessible to end users.
